Picture Collage Maker is easy to use and very flexible software which allows you to easily create collages from your favorite image files. The interface of the program is based on a wizard in which you can follow a few simple steps. You can start either a template or a grid collage wizard. In template mode, you can import pictures from file or folder by using the file browser only, because the "drag and drop" method is not supported. Plus, you can preview images. In the next step you can select a template, according to its category (e.g. greeting card, layout, calendar) and configure the collage panel setting (size and orientation). Furthermore, you can shuffle pictures in the collage, set the collage as wallpaper, save it as an image or send it via email. The only difference in the grid collage wizard is that you can set up the grid count, space and margin, as well as enable a default frame and shadow. The simple-to-use program takes up a moderate amount of system resources, has a very good response time and didn't freeze, crash or display errors during our tests. Unfortunately, there is no help file available. Also, Picture Collage Maker doesn't come with any kind of advanced settings. For example, you cannot make image adjustments (e.g. brightness, contrast). It fell for the "but he's our own" argument for the whole "grab 'em by the pussy" thing and every other outrageous act that Trump has committed since he declared his candidacy. While they were busy tarring Trump's character, one very important thing was happening: Trump managed to grow the party to unprecedented heights. The natural debate in a big tent party is which candidate should get the nomination. But Trump was not only leading the nominee field, he was also leading his party into a major shift — whether it liked it or not. The GOP managed
